

Musikas Instruction Manual

Welcome to the Musikas YouTube downloader! Provided in this manual are instructions on how to properly install the app on any machine as well as information about how the code of the app works.

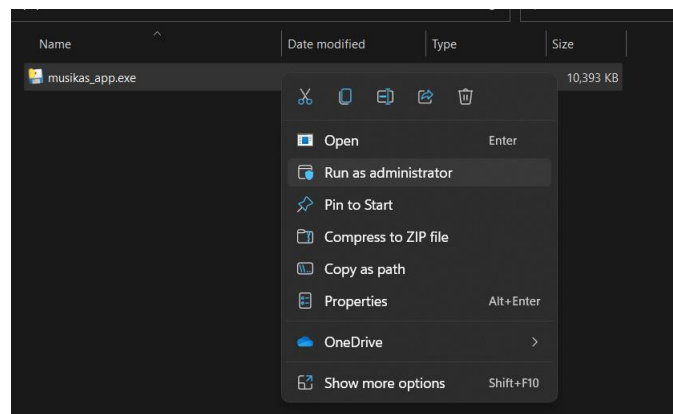

INSTALLING THE APP

1. Open the file named **Musikas-Release** and navigate to the **dist** folder.

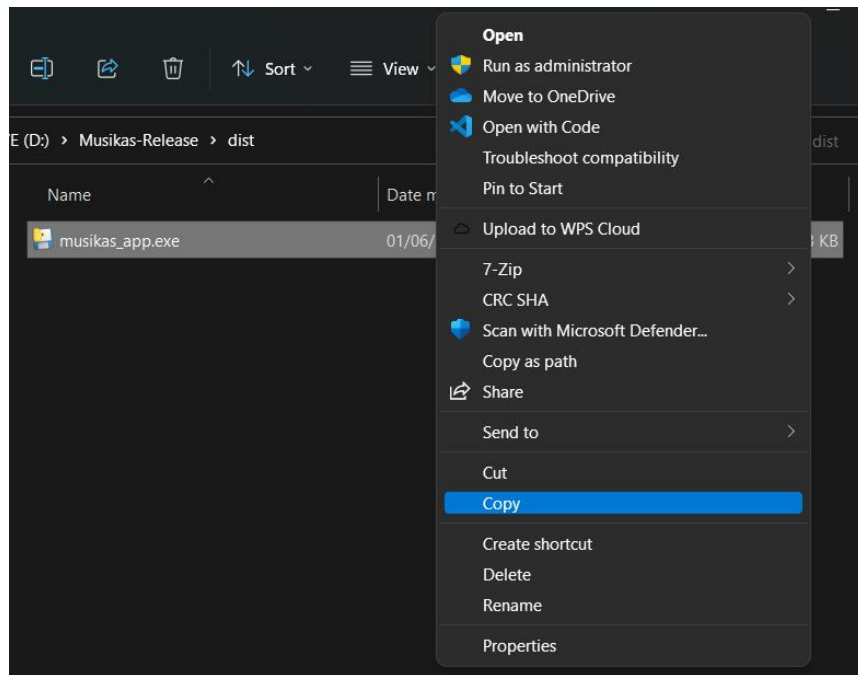

Name	Date modified	Type
build	31/05/2022 09:15	File folder
dist	01/06/2022 10:28	File folder
main.spec	01/06/2022 10:25	SPEC File

2. Click on the **dist** folder and right-click on the file named **musikas_app.exe**

3. Click on **Show more options** and select **create shortcut**

4. Move the shortcut anywhere you want. The app can be accessed simply by clicking on the shortcut as it will trigger the **musikas_app.exe** file to open.

HOW THE APP WORKS

The app works by scraping YouTube search results from the search queries given to obtain the link of the YouTube video. The link is then passed through a YouTube module which downloads the file in the form of a blank mp4 video. The video is then converted into an mp3 if the audio option is selected in the drop-down menu. To prevent the app from freezing when the download process occurs, threading is temporarily invoked.
